Lobby Conference Room  
San Francisco, CA 94103

Conference Call: 888-363-4749

Access Code: 6265590

Security Code: 0918

### **To Whom It May Concern:**

The Corps is holding its monthly Interagency Meeting on Thursday, September 13, 2018. A representative from your agency is invited to attend so that they may hear the project presentations and offer feedback on the issues important to your agency.

The security in this building requires visitor passes to be requested a minimum of 24 hours prior to a meeting. Please indicate with an email or telephone call if a representative from your agency will attend, otherwise they may not be admitted into the building. Once you arrive, please wait in the lobby for a Corps representative to escort you to the meeting room.

The agenda is as follows:

#### **09:00AM – 10:00AM**

**Project:** Codornices Creek Restoration at Kains Avenue

**Applicant/Consultant:** City of Berkeley/California Urban Stream Partnership

**Project Location:** The project is located in Codornices Creek at Kains Avenue in the City of Berkeley, Alameda County.

**Synopsis:** The City of Berkeley and the California Urban Streams Partnership propose to restore a heavily degraded approximate 195 foot-reach of Codornices Creek. The project would restore a stretch of the creek to reduce flood risks and to stabilize eroding creek banks by removing falling concrete and then installing various soil bioengineering techniques into the streambanks. The project is anticipated to benefit California Central Coast steelhead which migrates upstream to spawn within this watershed.

**10:10AM – 11:10AM**

**Project:** Colma Creek Flood Control Zone Channel Improvement Project

**Applicant/Consultant:** County of San Mateo Department of Public Works/WRECO

**Project Location:** The project is located in Colma Creek Flood Control Channel downstream of the Utah Avenue Bridge in the City of South San Francisco approximately 0.63 mile northeast of the Interstate 380/U.S. 101 interchange, San Mateo County.

**Synopsis:** The County of San Mateo proposes to improve the Colma Creek Flood Control Channel in order to strengthen flood conveyance and alleviate flooding in the adjacent commercial/industrial area. Floodwalls would be constructed on both banks to increase channel capacity. The project would also repair or replace eleven existing deteriorating or damaged culverts.
